

Centerville has always been home for me. From childhood to raising my family here with my husband Matt, I have cherished the sense of safety, connection, and small-town feel that make our community unique.

As a licensed civil engineer with nearly three decades of experience in water and infrastructure planning, I bring both technical expertise and a long record of community service to the City Council. Since joining the Council in 2022, I have worked to ensure Centerville remains a place where families thrive while preparing responsibly for future needs.

My priorities include:

- Fiscal Responsibility – Maintaining a balanced budget, pursuing grants, and leveraging outside funding to strengthen infrastructure while carefully weighing impacts on residents.
- Infrastructure Planning & Maintenance – Making smart, long-term investments in utilities, roads, and water resources.
- Public Safety – Supporting police, fire, and emergency services.
- Balanced Growth – Preserving our family-friendly character while carefully managing growth pressures.
- Quality of Life – Promoting recreation, arts, parks, and trails that bring neighbors together.

I would be honored to continue serving you on the Centerville City Council, listening to residents, applying sound engineering judgment, and working toward solutions that benefit our community today and tomorrow.
